

Lean Leaders Workshop

Course Content

The Lean Leaders workshop is primarily for senior managers and directors whose plans to strategize, develop and drive organization wide lean strategy. Lean Leaders are responsible for strategizing Lean model and apparent alignment towards overall organization's vision and performance index. Their involvement in project team chartering, reviews progress, help remove barriers for executioners, are crucial in strategizing and deploying Lean successfully.

The Lean Leaders workshop provides the internal capability and skills to drive real change and establish sustainable improvements in operational efficiency

This is a foundation course of a Lean deployment. The object is to train Leader(s) in selection and support Lean projects. "Hands on" training in several of the Lean tools is provided during this course. The course consists of 2 days of work-out strategy.
